Discharge instructions

Patient: Arjun R. (age 12) · Discharge date: October 16, 2026

Procedure: laparoscopic appendix removal (appendectomy).

Medications

Amoxicillin 500 mg: take one capsule by mouth three times daily for 7 days starting October 16, 2026.

Paracetamol 500 mg: one tablet every 6 hours as needed for pain. Do not exceed 4 tablets in 24 hours.

Ondansetron 4: take before meals if feeling sick.

Do not take ibuprofen.

Care at home

Keep the wound dressing clean and dry for 5 days.

Walk around the house three times a day.

No sports or heavy lifting for 2 weeks.

Follow-up

Follow up with Dr. Mehta at City Children’s Clinic on October 23, 2026 at 10:30 AM.

When to get help

Call the clinic if the wound becomes red or leaks fluid, or if fever is above 101 F.

Call 108 right away for severe stomach pain, vomiting blood or trouble breathing.
