NORTHSIDE COMMUNITY HOSPITAL · CARE TRANSITION

Medication directions conflict

Discharge summary · Synthetic safety example

SYNTHETIC DEMO ONLY · Fictional patient and instructions for manual software testing. Not for clinical use.

Patient: Jordan Mitchell **Discharge date:** October 13, 2026

Discharge information

Example prepared for manual testing. The conflicting instructions below are intentional.

Medications

Warfarin 5 mg: Take every evening.

Additional medication note

Warfarin 2.5 mg: Take every evening until next INR test. This later note conflicts with the medication list above.

Follow-up

Follow up in 7 days. The date, time, and clinic location are not specified here.

Manual test cue

Expected behavior: preserve both directions, flag the conflict and high-risk medication, and block calendar scheduling until a clinician clarifies the instructions.
